

NAGASAIGOWD GAJULAPATI

Data Engineer (Datastage Developer)

☎ 8688799287 @ nagasaigajulapati@gmail.com 🔗 <https://www.linkedin.com/in/nagasaig1/> 📍 Hyderabad, Telangana

SUMMARY

Results-driven Data Engineer with 2 years 9 months of experience in IBM Infosphere DataStage and SQL. Specialized in designing, optimizing, and automating ETL workflows for data integration and warehousing. Proven strength in performance tuning, data accuracy improvements, and solving complex data problems while delivering solutions aligned with business needs.

SKILLS

Tools/Frameworks

IBM DataStage, Azure Data Factory, Azure Databricks, PySpark

Databases

IBM DB2, Microsoft SQL Server, AS400

Languages

SQL, Python, Unix Shell Scripting

Data Warehousing & Data Engineering

ETL Development, Data Warehousing, Data Modeling, Fact Tables, Dimension Tables, SCD Type 2, ETL Pipelines, Parallel Processing, Job Orchestration

Other

Query Optimization, Performance Tuning, Data Quality Checks, Requirement Analysis, Production Support, Monitoring & Scheduling

EXPERIENCE

Datastage Developer

Nivi Software Solutions Pvt Ltd

📅 06/2023 - Present 📍 Hyderabad, Telangana

IT Solutions and Software Development

- Designed, built, and maintained 50+ production ETL jobs, improving data reliability, validation accuracy, and downstream consistency.
- Improved SQL performance by 25% by designing reusable user-defined functions (UDFs) and integrating them into DB2 and SQL Server queries.
- Hands-on experience in data warehousing concepts, including parallel job design, data partitioning, and end-to-end ETL optimization.
- Developed high-performance parallel jobs using Transformer, Lookup, Join, Sort, Copy, Funnel, CDC, and Filter stages to handle complex transformations.
- Demonstrated strong command of RDBMS concepts, writing advanced SQL for data transformation, validation, and performance tuning across DB2 and SQL Server.
- Automated and controlled batch workflows by orchestrating Sequence and Parallel jobs, enabling reliable scheduling and execution through DataStage Director.
- Collaborated with the Cognos team to analyze business requirements and deliver scalable, maintainable data solutions in a production environment.

PROJECTS

ACTPOL INSIGHTS

📅 10/2024 - Present 📍 Hyderabad, Telangana

- Contributed to a centralized police information system by building and maintaining end-to-end ETL pipelines that consolidate operational and administrative data for law enforcement reporting.
- Implemented SCD Type 2 dimensions and fact tables to track historical changes while reducing data redundancy and improving data consistency across the system.
- Automated and monitored daily batch data pipelines to ensure consistent, on-time data delivery for reporting and analytical use cases.

NANZI

📅 06/2023 - 09/2024 📍 Hyderabad, Telangana

- Supported a border management platform used by airport and seaport immigration authorities to track entry and exit records, enabling accurate monitoring of cross-border movement.
- Built and maintained entity-link data models to integrate immigration and residence-permit information, ensuring consistency and traceability across systems.
- Automated and controlled batch data workflows to validate permit status and improve data reliability for downstream operational and reporting processes.

EDUCATION

Bachelor of Science (B.Sc.)

Adikavi Nannaya University (AKNU), Rajamahendravaram

📅 2019 - 2022 📍 Rajamahendravaram

GPA

8.96 / 10

Intermediate (MPC)

Narayana Junior College

📅 2017 - 2019 📍 Rajamahendravaram

GPA

8.73 / 10

CERTIFICATIONS

Azure Data Factory for Data Engineers - Udemy
